

AccuDos

Metered-dose applicator for spot spraying and selective treatments

With its ability to apply metered volume of spray liquid, AccuDos is ideal for spot spraying weeds and for selective fungicide and insecticide treatments.

- Accurate delivery to the spray target
- 'Dial-in' facility to dispense a measured amount of liquid
- Includes a selection of spray nozzles for varied droplet size and spray patterns
- A non-drip check valve design
- Simple to fill, clean and maintain
- Highly versatile and suitable for use in a wide range of situations

An ideal solution for spot spraying

The AccuDos range of spray applicators offers an ideal choice for selective fungicide and insecticide treatments and spot weed control.

AccuDos allows users to 'dial-in' the pre-determined measured volume of spray liquid to be dispensed.

A choice of spray nozzles, selected to deliver the appropriate droplet size range and spray pattern, are available to ensure accurate delivery to the spray target. A non-drip check valve is fitted as standard.

Highly versatile, the AccuDos range is suitable for use with herbicides, insecticides and selective fungicides. It can be used in a wide range of situations including public health, amenity, pasture, plantations and sports and turf. It is also used in animal health for vaccinating day old chicks and can treat up to 5,000 birds in under 10 minutes.

User-friendly and safe

A choice of 1 and 5 litre backpacks is available with the AccuDos 2P version which can dispense 0.1-2ml/shot, whereas the AccuDos 25P and 25S models can be supplied with either a 5 or a 10 litre backpack and can produce repeatable 2.5-25ml shots. Liquid flow can be shut off using an in-line tap which allows for disconnection of the backpack and hand lance. A choice of flat fan or hollow cone nozzles is available.

Specification

	AccuDos 2P	AccuDos 25P & 25S
Weight:	800g	860g
Volume dispensed:	0.1 - 2ml/shot	2.5 - 25ml/shot
Total capacity:	1 or 5 litres	5 or 10 litres
Length of lance:	300mm	300mm
Droplet size range: (coarse spray)	250-350µm	250-350µm
