

KS16

General purpose knapsack sprayer

KS16 is a general purpose, lever-operated knapsack sprayer suitable for a wide range of agricultural and horticultural applications.

- Robust and easy to maintain
- Competitively priced
- Supplied with a range of nozzles to suit most spraying operations
- Chemical resistant seals
- Comfortable adjustable shoulder straps

A versatile sprayer for a wide range of applications

KS16 is a good quality, lever-operated knapsack sprayer suitable for a wide range of agricultural and horticultural uses.

It is highly versatile and compatible for use with most crop protection products.

Comfortable and easy to use

Robust and easy to maintain, the KS16 sprayer has been designed with ease of use in mind. KS16 features an internal piston pump and pressure cylinder, comfortable adjustable shoulder straps and a 16 litre tank.

The tank design incorporates a wide neck and comes complete with a filter for enhanced safety of filling operations.

KS16 also features chemical resistant seals and can therefore be used with most agrochemicals.

Optional accessories are also available which include a selection of additional nozzles, CFValves™ and spray shield.
